			Fetal Heart		
Utility			1st FetalHeart		
			Biopsy		
					Quick Preset Edit

* PortraitVue™ can be operated under the following conditions :

Probe	Application
CMV1-10 CV1-8A EV2-12	OB, GYN Preset

1	3D Scan	Scan the Mid-sagittal plane of fetal face to get the frontal of the fetal face in 3D mode.
2	PortraitVue	Click the [PortraitVue] button on the touch screen.

Confidential

★ Tips

Able to adjust the angle and Quality before acquiring the 3D, Set the scan quality of 3D/4D.

- Better image quality to Extreme, but slower to acquire.
- Lower image quality to Low, but faster to acquire.

3. PortraitVue™ Marking Guide

1	Mark on the center of eyelids	Click on center of both eyelids with the [Set] Button.
2	Mark on the lips	Click on center of lips with the [Set] Button.

\star Tips

We recommend to mark on 3 seeds that expressed with the exact Eyes-Nose-mouth

- * Case of inappropriate display
- Generate the Eyes/Mouth in wrong place when marking point would be wrong,
- Marking on the 2 eyes too narrow or too far away.
- Marking on the seed points even the fetal doesn't look at the front. (Need to be seen both 2 eyes)
